

CONTRACTORS STATE LICENSE BOARD LICENSE EXAMINATION STUDY GUIDE

ASBESTOS CERTIFICATION (ASB)

Content of the Examination

The Asbestos Certification (ASB) Examination is divided into five major sections:

1. Planning, Estimating, and Training (23%)

- Reading plans and specifications
- Regulatory agency notification
- Estimating material, labor, equipment, and disposal
- Training requirements for employees

2. Containment Area Preparation (29%)

- Area notification and signage
- Containment setup
- Utility isolation
- Negative air pressure

3. Asbestos Abatement Methods and Disposal (24%)

- Encapsulation and encasement
- Contamination prevention procedures
- Asbestos-containing material transportation and disposal

4. Documentation (7%)

- Health records
- Site activity records

5. Safety (17%)

- Personnel and job site safety
- Personal protective equipment (PPE) requirements
- Air sample collection

Percentages are approximate

Test Strategy

This is a multiple-choice examination with four choices per question. Examination questions are written to provide only one BEST answer. Some questions require mathematical computation. A calculator will be provided.

There is no penalty for guessing. If you are unsure about a particular question, it is better to try to answer the question than to leave the question blank.

Plenty of time is provided to answer all examination questions, so be sure to read each question and its four choices completely and carefully before selecting the BEST possible answer to the question.

Sample Questions

Below are three typical examination questions. The correct answer is marked with an asterisk (*).

1. Which of the following describes surfacing ACM?
 - a. Material that contains more than 1.000% asbestos*
 - b. Material that contains more than 0.100% asbestos
 - c. Material that contains more than 0.010% asbestos
 - d. Material that contains more than 0.001% asbestos

2. When removing asbestos at a multi-employer work site, the asbestos abatement contractor must do which of the following?
 - a. Ensure that all other employers leave the site.
 - b. Inform the local Cal/OSHA office within 48 hours.
 - c. Ensure that all asbestos is removed.
 - d. Inform each of the employers about the asbestos work being performed.*

3. When must a contractor require the use of protective clothing?
 - a. When Class II work requires removal of ACM exceeding 10 square feet
 - b. When airborne exposure exceeds the TWA and excursion limits*
 - c. When Class II work requires removal of TSI exceeding 25 linear feet
 - d. When a negative exposure assessment is produced

All questions are written and reviewed by licensed contractors who are actively working in the trade
