

CONTRACTORS STATE LICENSE BOARD LICENSE EXAMINATION STUDY GUIDE

CONCRETE (C-8)

Content of the Examination

The Concrete (C-8) Examination is divided into five major sections:

1. Planning and Estimating (28%)

- Planning concrete projects
- Estimating concrete projects

2. Pre-placement Preparation (27%)

- Demolition, grading, and excavating
- Layout and forming
- Installing drains and moisture barriers
- Installing reinforcement and embedded items

3. Placing and Finishing (17%)

- Placing concrete
- Applying finishes
- Curing and testing

4. Post-placement Tasks (7%)

- Applying stains and sealers
- Stripping forms; repairing, grouting, and caulking concrete

5. Safety (21%)

- Employee safety
- Job site safety

Percentages are approximate

Test Policy

This is a closed-book examination. No reference materials may be used during the examination.

Test Strategy

This is a multiple-choice examination with four choices per question. Examination questions are written to provide only one BEST answer. Some questions require mathematical computation. A calculator will be provided.

There is no penalty for guessing. If you are unsure about a particular question, it is better to try to answer the question than to leave the question blank.

Plenty of time is provided to answer all examination questions, so be sure to read each question and its four choices completely and carefully before selecting the BEST possible answer to the question.

Sample Questions

Below are three typical examination questions. The correct answer is marked with an asterisk (*).

1. How many cubic yards of concrete should a contractor order for a 20 ft. wide x 40 ft. long x 4 in. thick slab?
 - a. 8
 - b. 10*
 - c. 12
 - d. 30
2. What is the primary reason for adding polypropylene fiber to concrete?
 - a. To improve the concrete's appearance
 - b. To increase the curing time
 - c. To improve the workability of the concrete
 - d. To minimize plastic shrinkage cracking*
3. What does #6 refer to on a drawing of a structural wall section?
 - a. 3/4" reinforcing steel bar*
 - b. 3/4" anchor bolt
 - c. #6 conductor
 - d. 6" brick

All questions are written and reviewed by licensed contractors who are actively working in the trade
